

1. HOME PAGE

This is the homepage of the OECS data platform which has the options available to navigate through all the modules of the user interface application (see figure below).

The user interface application consists of seven modules: Data Bank, Data Dashboard, Quick Data, Data API, SDG Monitoring, Citizen Pulse and Microdata Library. This user manual provides guidance on how to use each of these modules. A burger menu at the top right corner of the homepage allows you to navigate to all modules of the OECS Data Platform.

Below is a brief description of each module.

1.1 Data Bank (Select - Locate - Explore)

This module provides the option to search data and create powerful visualizations based on the search results.

1.2 Data Dashboard (Select - Visualise - Share)

This module provides the option to navigate to an interactive dashboard where you can view country-wise indicator data using Bubble Chart and Rank Chart.

1.3 Quick Data (Capture - Visualise - Share)

This module allows you to create powerful and interactive visualizations using the data available at your end. It also provides the option to customize these visualizations using a variety of built-in features.

1.4 Data API (Retrieve - Visualise - Share)

This module allows you to export selected data in open-source JSON format or create and save API queries for use by other external systems.

1.5 SDG Monitoring

This module allows you to track and monitor the performance of SDG indicators.

1.6 Citizen Pulse

This module allows you to vote for up to six issues that matter most to you from the list of available options. You can also view the cumulative results submitted by other users.

1.7 Microdata Library

This module will redirect you to the external OECS Survey Catalogue page.
